

# Neutracid® PS | Technical Data Sheet

## Product Information

The Neutracid® PS is a non-corrosive derivative of sulfamic and acetate salts, used for exact regulation of disperse polyester dye-baths. It can be used to replace both Acetic Acid and Citric Acid in the plant.

## Benefits

- Non-irritant to the operator's skin
- Non-volatile
- Retains stable pH through heating stage (Due to lower volatility than Acetic Acid)
- Neutralizes core alkali in the fabric

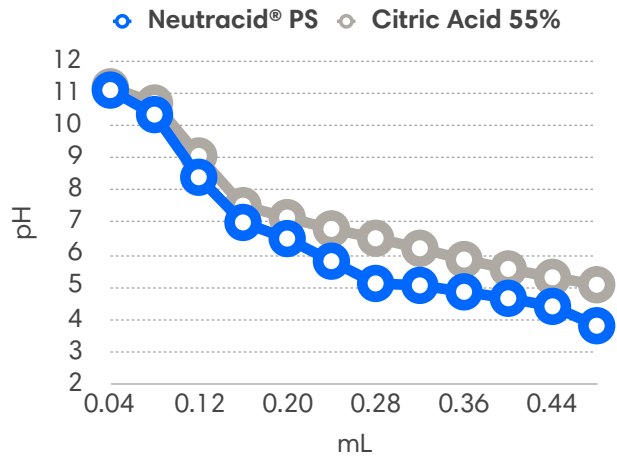

## Physical and Chemical Characteristics

Technical Data	Specs
Appearance	Liquid gold color
Ionic Character	No charge
Chemical basis	Acetates Sulfamic Acid Derivatives
pH	2.5-3.5 @ 1% sol.
Density	1.0-1.2 g/ml

## Product Application

Neutracid® PS must be applied at the beginning of the polyester dye bath. This product will assure, that the fabric maintains its pH throughout the process, guaranteeing minimal shade-change during warehousing of the fabric. The nature of this acid, will not only neutralize the surface of the fibre, it will also penetrate the core, and neutralize it.
