Product

The **Hyperion[®] TW80** is a nonionic surfactant and emulsifier often used in foods and cosmetics. This synthetic compound is a viscous, water-soluble yellow liquid.

Parameters

Parameters	Description
Appearance @25 °C	Liquid
Saponification Index (mg KOH/g)	45 - 55
Acidity Index (mg KOH/g)	2,0 max.
Hydroxylaine Index (mg KOH/g)	65 - 80
Water (%p)	3,0 max.

Application

Emulsifier in foods
Surfactant in soaps and cosmetics (including eyedrops), or a solubilizer such as in a mouthwash.
Emulsifier in the manufacture of the popular antiarrhythmic amiodarone.

Packaging

Hyperion[®] TW80 can be delivered in 200kg drums, or 1000 kg totes.

The above recommendations are based on extensive results done in the most professional manner. The user must try this product industrially first, to verify if the product is viable for further use. The technical information and application advice given in this **Novachem** publication are based on the present state of our best scientific and practical knowledge. As the information herein is of a general nature, no assumption can be made as to a product's suitability for a particular use or application and no warranty as to its accuracy, reliability or completeness either expressed or implied is given other than those required by law. These results however verified and certified by a third party, do not hold us liable in terms of performance deviations. These tests have been conducted in controlled environments. The user is responsible for checking the suitability of products for their intended use.
